I/we understand that the type of tree or shrub to be planted and location will be selected by MBG in accordance with the design and needs for the gardens. The price for a tree or shrub donation depends on the "current market price" for the type to be planted, plus the cost of planting and a plant identification plaque that also recognizes the donor. MBG will provide a list of what can be planted and the respective costs, to enable a selection before submitting the donation.
